ALL YOUR ESSENTIAL TESTING NEEDS—ONE SINGLE PLATFORM
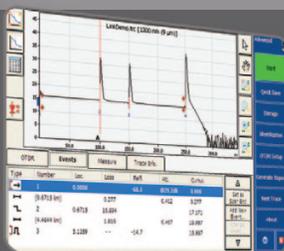

OTDR | FTB-720 LAN/WAN ACCESS

Best fit for all access networks: modularity, connectivity and affordability

Controlled launch conditions
> Accurate multimode testing in class CPR 1 or CPR 2 launch conditions results in successful 10G Ethernet turn-ups

Get the real picture of your link
> Uses the best OTDR specification benchmarks to see clearly what's on the link

Adaptable to all fiber types
> The perfect all-in-one OTDR for contractors to test singlemode, multimode and quadruple wavelengths

Ethernet | FTB-860 NetBlazer Series

Powerful, fast, intuitive 10M-to-10G Ethernet testing

Increased autonomy and productivity
> Streamlined navigation and intelligent autodiscovery

Rapid, accurate test results
> Multistream traffic generation and bidirectional EtherSAM and RFC 2544 test suites

Future-proof investment
> Field-upgradeable software

ConnectorMax Analysis Software

with the FIP-400 Fiber Inspection Probe

Eliminate guesswork and achieve clear-cut end-face analysis

Automatic pass/fail analysis with multiple-platform flexibility
> Available on the portable FTB-1, FTB-200 and FTB-500 platforms

Save time and money
> Lightening-fast results in seconds through simple one-touch operation

Complete test reports for future referencing
> Stores images and results for record keeping
